EDUCATION

University of South Florida

Tampa, Florida

Bachelor of Science in Computer Science | GPA: **4.00**/4.00

Expected in May 2025

Relevant Coursework: Data Structures, Program Design, Computer Organization, Logic Design, Programming Concepts

EXPERIENCE

Dell Technologies

Round Rock, Texas

Software Engineer Intern

May 2023 – August 2023

- Collaborated with **2** senior engineers to enhance a multi-cloud orchestration platform using Docker, Kubernetes, PostgreSQL, and RabbitMQ, ensuring seamless scalability across diverse cloud environments
- Conducted a successful Proof of Concept for company's cutting-edge technology acquisition worth **\$100 million**, demonstrating its capabilities in reducing operational overhead by deploying complex blueprints to cloud services
- Architected and implemented a robust infrastructure by efficiently isolating database services and messaging queue services into distinct virtual machines, optimizing resource utilization and enhancing system reliability

LEADERSHIP

Society of Hispanic Professional Engineers (SHPE)

Tampa, Florida

Software Workshops Director

June 2023 – Present

- Lead the promotion of technology within the chapter by organizing **6** annual software workshops on cutting-edge technologies, including Cloud, Docker, and Kubernetes, attracting an average of **50** participants per session
- Partner with top industry experts and seasoned instructors to curate and refine workshop content, guaranteeing its alignment with current tech trends and significantly enhancing its applicability for student real-world scenarios

Google Developer Student Clubs (GDSC)

Tampa, Florida

Tech Lead

January 2023 – Present

- Spearhead the development of GDSC's full-stack software development project in collaboration with the e-board team, utilizing cutting-edge technologies and innovative methodologies to deliver a robust and scalable solution
- Organize **4+** emerging technologies workshops per semester and provide hands-on training to the latest advancements, resulting in a **30%** increase in attendance and positive feedback from participants

RELEVANT PROJECTS

USF Course Notification System (Angular, Express, JavaScript, MongoDB)

- Established a full-stack website that let **200+** students subscribe and receive notifications about course availability
- Implemented parsing and subscription logic that is capable of parsing over **4000** courses per minute and notifying subscribers of course availability in real-time, resulting in a **99%** reduction in page load time
- Created REST API endpoints using Express, implemented user authentication, and subscription storage using MongoDB to ensure secure and reliable data storage and retrieval

Personal Blog Website (Node.js, Express.js, MongoDB)

- Successfully developed and launched a personal blog website using EJS and Node.js, resulting in a user-friendly interface and improved site traffic by **25%**
- Built a MongoDB database, enabling easy CRUD (create, read, update, delete) operations for blog posts
- Designed a scalable back-end with Node.js and Express.js, reducing site load time by **40%**

Arduino Obstacle-Avoiding Robot Project

- Successfully led a team of 5 members and organized 2 team meetings every week to develop the Arduino obstacle-avoiding robot, resulting in a completed project within the timeline and budget
- Engineered a precise obstacle-avoiding algorithm using ultrasonic sensors, resulting in a **95%** success rate and improved robot functionality in complex environments

SKILLS

Technical Skill: Full Stack Development, Object-Oriented Programming OOP, DevOps, Data Structures and Algorithms

Technology: Python, C, C++, Java, JavaScript, HTML, CSS, MongoDB, SQL, PostgreSQL, RabbitMQ
React, Angular, Bootstrap, Node.js, Express.js, EJS, REST API, Docker, Kubernetes
